

Bulletin

Michigan Department of Community Health

Distribution: Hospital 01-03
Health Maintenance Organizations 01-03

Issued: April 1, 2001

Subject: Required Hospital Service Provision; DRG and Per Diem
Equivalent Payments; Outpatient Services; Prompt Payment;
Binding Arbitration; Policy Clarification

Effective Date: May 1, 2001

Programs Affected: Medicaid, Children's Special Health Care Services

The Medical Services Administration (MSA) desires to have hospitals and Health Maintenance Organizations (HMOs) work together cooperatively to provide hospital services to Medicaid beneficiaries. Each hospital and HMO must enter into one of the three following relationships: 1) the preferred arrangement is for the HMO and hospital to reach a contractual agreement regarding the provision and payment of services, 2) in the absence of a contractual agreement, the HMO may elect to pay the hospital Medicaid's DRG payment schedule for medically necessary, authorized non-emergent inpatient services and Medicaid fee-for-service rates for outpatient services, or 3) alternatively, in the absence of a contractual agreement, the HMO may pay the hospital using Medicaid calculated per diem equivalents to the Medicaid DRG payments for medically necessary, authorized non-emergent inpatient services and Medicaid's fee-for-service rates for outpatient services.

In order to receive graduate medical education funds or any funds from the fiscal year '01 Outpatient Hospital Adjustor Pools, a hospital must comply with the policies outlined in this bulletin.

Required Hospital Service Provision

Under the Medicaid program, the following applies to all hospitals enrolled and participating in the Medicaid program. A hospital must admit and treat Medicaid beneficiaries to its: 1) inpatient units/services, and 2) outpatient emergency units/services and clinics.

These requirements apply regardless of the Medicaid payment source. The requirements apply to Medicaid participating hospitals whether payment to the hospital is made by Medicaid fee-for-service directly or through one of its contracted HMOs.

A hospital may not selectively choose to admit Medicaid fee-for-service patients, but not Medicaid HMO patients. Nor may a hospital choose to admit patients from certain Medicaid HMOs, but not others. When a hospital enrolls in the Medicaid program, it agrees to admit and treat Medicaid beneficiaries for appropriately authorized, medically necessary care arranged by a physician with admitting privileges to its facilities. This policy supersedes the *Rendering Services Section* (page 17) of Chapter I in the Hospital Manual.

The non-emergent admission of a HMO beneficiary must be authorized by the beneficiary's HMO. The length of stay authorized by the HMO must be appropriate to the patient's condition, the admitting diagnosis and the patient's scheduled treatment program (it must take into account anticipated diagnostic and operative procedures) while in the hospital. The HMO's authorization for admission becomes its contractual obligation to pay the hospital for the admission and services provided.

Should a hospital refuse to admit a Medicaid beneficiary whose physician has admitting privileges to it, the beneficiary's HMO must notify MSA's Office of Medical Affairs (OMA) within 24 hours of the denied admission. Both the hospital and the HMO will be given an opportunity to explain the reasons the beneficiary should or should not be admitted to the hospital. If after review of the case OMA decides the beneficiary should be admitted, it will notify both the hospital and the HMO of its decision. If the hospital refuses to comply with the decision of OMA, the hospital will be disenrolled from the Medicaid program for a period of two years. If the hospital complies with the decision of OMA, but continues to demonstrate a pattern of non-compliance with the intent of this policy by having three negative decisions by OMA against it during a twelve-month period, the hospital will be automatically removed from the Medicaid Interim Payment (MIP) program for a year. If a hospital continues to have negative decisions by OMA after it is removed from the MIP program, the hospital will be disenrolled by the Medicaid program for a period of two years.

DRG and Per Diem Payments

In the absence of a contract or agreement between a Medicaid enrolled hospital and a HMO, the HMO must pay, and the hospital must accept as payment in full, Medicaid's DRG payment or the Medicaid calculated per diem equivalent for any Medicaid HMO beneficiary admitted to the hospital for either an emergent or non-emergent admission. The hospital may not balance bill either the Medicaid beneficiary or the Department of Community Health (DCH) for any difference between its original charge and the HMO payment.

Medicaid makes separate payments to acute care hospitals for operating and capital costs. The combination of the operating and capital payments represents payment in full to the hospital for the admission of a Medicaid beneficiary.

HMOs must notify out-of-network hospitals at the first admission on or after April 1st how they intend to pay the hospital for the HMO's Medicaid beneficiaries for the remainder of the year (current admission to March 31st). The HMO must reimburse the out-of-network hospital either by Medicaid DRG payment or the Medicaid calculated per diem equivalent. Once the HMO has notified the hospital of the payment method it will use, it must continue to use the same method for that hospital for the remainder of the year (for the purpose of HMOs paying out-of-network hospitals, the year runs from April 1st to March 31st). HMOs may use either reimbursement

methodology (i.e. DRG or Per Diem) for different hospitals as long as they use the same methodology for each hospital for the entire billing year (April 1st to March 31st).

Instructions for calculating DRG payments appear in Chapter VIII of the Hospital Manual. The DRG relative weights and outlier thresholds are included as an appendix to the manual. Hospital DRG prices, inpatient cost to charge ratios, and capital per diems are attached to this bulletin. DRG payments made to hospitals use DRG relative weights, outlier thresholds, DRG prices, inpatient cost to charge ratios, and capital per diems in effect on the patient date of admission.

Listed below are the Medicaid calculated inpatient hospital statewide average per diem equivalents by service category:

Service Category	Payment Method	Statewide Average
Medical	Per Diem	\$ 889
Alternate Weight Neonates	Per Diem	1,065
Surgical	Per Diem	1,614
Rehabilitation	Per Diem	875
Maternity		
Vaginal Delivery	Per Admission	1,733
C-Section	Per Admission	3,424
Other Maternity	Per Diem	736
Normal Newborn	Per Diem	287

Other hospital specific information (i.e., Conversion Factors, capital per diems, etc.) needed to calculate hospital specific per diem equivalent payments is attached to this bulletin. Health plans choosing to pay the per diem equivalents must use the following methodology to calculate the per diem payments.

A hospital's per diem equivalent is the product of the total number of hospital days for the patient admission *times* the statewide service category per diem multiplied by the hospital specific Conversion Factor plus the hospital's capital per diem. All Other Insurance payments are deducted from the calculated payment.

Per Diem equivalent payments for medical/surgical, maternity (other than vaginal and C-section deliveries) and normal newborn admissions are calculated as follows:

$$\text{Total days for Admission} \times [(\text{Service Category Per Diem} \times \text{Hospital's Conversion Factor}) + \text{Hospital's Capital Per Diem}] - \text{Other Insurance Payments}$$

Vaginal and C-section deliveries are paid by admission for operating costs. In order to calculate payments for deliveries, the statewide per admission equivalent is multiplied by the hospital specific Conversion Factor. A capital payment is added to the hospital's operating per diem payment. It is the total number of hospital days covered by the patient admission multiplied by the hospital specific capital per diem. All Other Insurance payments are deducted from the calculated payment.

Per Admission equivalent payments for vaginal and C-section deliveries are calculated as follows:

Vaginal Deliveries:

$[(\text{Statewide Payment for Vaginal Deliveries} \times \text{Hospital's Conversion Factor}) + (\text{Total Days for Admission} \times \text{Hospital's Capital Per Diem})] - \text{Other Insurance Payments}$

C-Sections:

$[(\text{Statewide Payment for C-Sections} \times \text{Hospital's Conversion Factor}) + (\text{Total Days for Admission} \times \text{Hospital's Capital Per Diem})] - \text{Other Insurance Payments}$

Claims paid by the percent of charge method (typically organ transplants) using the hospital's inpatient cost to charge ratio will continue to be paid using this ratio even for those hospitals paid per diem equivalents. A capital payment is added to this payment. It is the total number of hospital days covered by the patient admission multiplied by the hospital specific capital per diem. All Other Insurance payments are deducted from the calculated payment. Payment for claims paid using the hospital's inpatient cost to charge ratio is calculated as follows:

$(\text{Hospital's Charges} \times \text{Hospital's Inpatient Cost to Charge Ratio}) + (\text{Total Days} \times \text{Hospital's Capital Per Diem}) - \text{Other Insurance Payments}$

An admission is a cost outlier when costs (charges *times* the hospital's inpatient cost to charge ratio) exceed the computed cost threshold. A claim paid using a hospital's inpatient cost to charge ratio cannot be cost outlier.

Payment for Per Diem cost outliers is calculated as follows:

$(\text{Total Days for Admission} \times \text{Service Category Per Diem} \times \text{Hospital's Conversion Factor}) +$
 $((\text{Charges} \times \text{Hospital's Inpatient Cost to Charge Ratio}) - (\text{Cost Threshold})) \times 85\% +$
 $(\text{Total Days for Admission} \times \text{Hospital's Capital Per Diem}) - \text{Other Insurance Payments}$

The cost threshold is the larger of:

- $2 \times (\text{Total Days for Admission} \times \text{Service Category Per Diem} \times \text{Hospital's Conversion Factor})$, or
- \$50,000

Under the per diem methodology, the per diem payment made is based on the patient's admitting diagnosis and condition. However, if the patient condition changes during the hospital stay, the per diem payment should be adjusted to reflect the appropriate service category of care rendered. (For example, if the patient is admitted for treatment of a medical condition, but surgery becomes necessary during the hospital admission, the hospital should be paid under a medical per diem for those days prior to the surgery and the surgery per diem for those days on and after the surgery.)

Payments by HMOs to out-of-network distinct part rehabilitation units and freestanding rehabilitation hospitals continue to be made using Medicaid calculated unit and hospital specific operating and capital per diems. All Other Insurance payments are deducted from the calculated payment.

Rehabilitation per diem payments are calculated as follows:

$$[\text{Total Days for Admission} \times (\text{Operating Per Diem} + \text{Capital Per Diem})] - \text{Other Insurance Payments}$$

Hospital specific information is updated according to schedules included in the Hospital Manual. Capital data is taken from the same time period used to establish the DRG payments. The above per diem equivalents will be updated in response to changes in the hospital specific information and updates to the DRG rates. In the future, when the per diem equivalents are updated, they will be sent out under separate cover.

Outpatient Services

In the absence of a contract or agreement between a HMO and a Medicaid enrolled hospital, the HMO must pay and the hospital must accept Medicaid's fee-for-service payment rate as payment in full for any Medicaid HMO beneficiary receiving emergent services in the hospital's emergency room or any other authorized outpatient services.

Prompt Payment

Hospitals and HMOs should be aware of the prompt payment requirements specified in P.A. 187 of 2000.

A clean claim is a claim that provides the HMO with sufficient information and in a form such that the HMO can make payment to the hospital without need for further information from it. The HMO must provide sufficiently detailed instructions and examples to the hospital such that a person following those instructions can create a clean claim without further assistance or instruction.

Failure to pay out-of-network hospitals for authorized services at the Medicaid fee-for-service equivalent as indicated above or to make prompt payments to out-of-network hospitals may lead to a HMO's termination from participation in the Medicaid program or other appropriate sanctions less than termination as determined by the Department. In addition, DCH reserves the right to withhold funds from a HMO's monthly capitation to assure that monies owed by the HMO to out-of-network providers are paid.

Hospitals and HMOs should be aware of the interest charges specified in P.A. 187 of 2000.

Binding Arbitration

When arbitration is requested by a hospital or HMO to resolve claims processing and payment disputes, the other party is required to participate in the binding arbitration process.

DCH will provide a list of neutral arbitrators that can be made available to resolve billing disputes. These arbitrators will be organizations with the appropriate expertise to analyze medical claims and supporting documentation available from medical record reviews and capable of determining whether a claim is complete, appropriately coded, and should or should not be paid. A model agreement will be developed by DCH that both parties to the dispute will be required to sign. This agreement will specify the name of the arbitrator, the dispute resolution process, a time frame for the arbitrator's decision, and the method of payment for the arbitrator's fee.

The party found at fault will be assessed the cost of the arbitrator. If both parties are at fault, the cost of arbitration will be apportioned.

Policy Clarification

This bulletin clarifies policy language in the Hospital Manual regarding the definition of an HMO as "Other Insurance". Medicaid HMO coverage, which is identified by a level of care code "7" or "11" on a beneficiary's Medicaid card, is not defined as other insurance. References to "other insurance" payments in Appendix C, by definition, do not include payments made by Medicaid HMOs. The Medicaid fee-for-service equivalent payment made by a Medicaid HMO is considered payment in full.

Manual Update

Retain this bulletin for future reference.

Questions

Questions regarding this bulletin should be directed to: Provider Inquiry, Medical Services Administration, P.O. Box 30479, Lansing, Michigan 48909-7979. Providers may also phone toll free: 1-800-292-2550.
